

HOW TO MAKE TEA

By Jie Zhang

03/05/2022

This user instruction is intended to guide readers through how to make tea using tea leaves instead of teabags, carefully following this guide would allow readers to perform a complete series of actions to make tea and enjoy tea.

Supplies List:

- **Teapot**
- **Teacup / any cup**
- **Tea leaves**
- **Kettle for hot water**

Preparing Stage

1. Boil water using a kettle

warning: beware of excess heat/hot water

2. Clean/warm the teapot and teacup with hot water

warning: beware of excess heat/hot water

- pour hot water into the teapot and the teacup
- slowly rotate the teapot and the teacup with hot water in them to clean and warm them
- pour out the hot water

purpose: increase the temperature of the teapot and the teacup in preparation for tea leaves to expand into their original form

Main Stage

1. Place tea leaves into the teapot

2. Pour hot water into the teapot

warning: beware of excess heat/hot water

- Wait for around 3 minutes for the tea leaves to fully expand into their original form (“awakening the tea leaves”)

3. Pour out the hot water in the teapot

- The first pot of tea was for cleaning the tea leaves and helping tea leaves expand.

4. Pour hot water into the teapot

- Let it sit for around 3 minutes for the hot water to fully absorb the flavors from the tea leaves

Final Stage

1. Pour the tea from the teapot into the teacup

warning: beware of excess heat/hot water

- Slowly pour the tea from the teapot into the teacup

2. Enjoy the tea!
